**We encourage all Sunfish Worlds participants to use the free i-Sail tracker app.**
This smartphone/ iPhone app registers your track(s) using GPS; no data connection is needed. After you stop tracking, the track will be uploaded to the I-Sail server. This can be done automatically or manually, depending on your preferred settings. You can view recorded tracks, as well as extensive statistics about those tracks in the app and on www.I-Sail.com. **I-Sail will combine all tracks per heat, so you can compare your sailing with the rest of the fleet**.

Step 1: Download the i-Sail app for either Android or iPhone. Install the app and accept the permissions.	
Step 2: Start the app. If you allready have an i-Sail account login. If you do not have an account press the [Create Account] button. Registration is free!	
Step 3: After completing the registration process login. The home screen shows "No Event Registration"; you need to pick an event. Go to the "Events" tab and tab the event for which you want to do tracking. You will need to enter a password. This was sent to you by email. If you did not receive that email, please request the password via an email to isail@sunfishworlds.org	

Step 4: Next you'll see all participants in the event. Search for your name and tap that entry. "Selected"will appear on the right side. If you do not see your name listed, first check if you selected the correct event. If you are then report it to isail@sunfishworlds.org and we will add you asap.	
Step 5: Go back to the home tab. The selected event and participant will appear in the bottom of the screen. When ready to launch your boat, press the [Start Tracking] button, accept the default track name, store your phone in a waterproof case (your own or the one in the goody bag) and go sailing!	
Step 6: After sailing, [Stop Tracking]. I-Sail will automatically upload your GPS data on to the I-Sail Server. If not, you can upload the tracks later on manually. Go to 'Options', and choose 'Retry Upload'	
Step 7: We will publish links to the replay sessions on http://sunfishworlds.org/. This will give you an idea: http://app.i-sail.com/eventDetails/346/raceDetails?race=Race%201	

Tips & Tricks
- Never forget to put your phone inside a waterproof casing.
  YOU are responsible for your phone; We accept no liability for any (in)direct or consequential loss or damage.
- Start tracking on land, stuff your phone away as deep as possible into whatever waterproof (dry)bag and/or case and stop tracking only when you are safely back on shore.
- i-Sail is designed to minimize battery usage. With most modern smartphones, a full day of sailing and tracking should leave you with about 40-50% of battery. Enough to make it to the charger late at night!
- For questions contact isail@sunfishworlds.org
